

INT- PIRATE PLANET ENGINE ROOM

ROMANA is busy working on the doomsday machine. The Doctor is trying to seem important.

DOCTOR
What do you think Romana?

ROMANA
I think you're right. The dilithium matrix seems repairable. I just need to realign the takion generator.

DOCTOR
Excellent.

ROMANA
You're right though, it's a strange mixture of technology.

DOCTOR
Yes. Well as soon as he brings the hymetracide...

ROMANA
I will know what to do with it.
(beat)
Why does he do it, do you think?

DOCTOR
The Captain?... Oh, he is a very dangerous man.

ROMANA
(scoffs)
All that talk of his is just bluster.

DOCTOR
There is something else going on here Romana and I don't like it.

ROMANA
What do you think it is?

DOCTOR
I don't know. That's why I don't like it. I'm popping back to the Tardis, here you may need my sonic screwdriver.

He offers her his Sonic Screwdriver.

ROMANA

Thank you but I've made my own.

DOCTOR

Really. May I have a look?

She hands it to him.

DOCTOR

Not bad. A bit basic though. Here you go. Now then, I'm off.

The Doctor hands her **his screwdriver** and keeps hers.

ROMANA

Uh...Doctor.

Oops. The Doctor hands back her screwdriver.

DOCTOR

Oh. So sorry.
